To Whom So Ever It May Concern

It is with much delight that I recommend my student Ms. Sakshi Laxminarayan Nema for your research internship program - SURGE. I have known Sakshi for two years in my capacity as Head of the Department with the Department of Computer Science at Shri Ramdeobaba College of Engineering and Management University. In the third year, I had taught her Compiler Design course. She has a keen interest in data and maths and thus developed an interest in the fields of Data Science, Artificial Intelligence, and Machine Learning. Her skills and passion for the domain make her an ideal fit for your research program.

In this context, I can vouch for her consistently brilliant academic performance and dedicated attitude to her studies. She has been among the top-performing students with a CGPA of 9.3. She is perceptive, intelligent, inquisitive and seeks to gain in-depth knowledge with her determination and hard work. She has done great work in her mini-projects namely - Twitter sentimental classifier using Python, Movie recommendation system using Python, System for Online BookStore using MongoDB and Python. The student has been a pivotal member of the student society of our department since last year and carries her duties with due diligence and enthusiasm thus giving out her best. She is the Event Lead of the CodeChef RCOEM Chapter. She has also been a part of the coding club - The CodeBreakers, Robotics Club, and the Rotract Club of the college.

Her strengths are as impressive as her intellectual accomplishments. She's an active, cheerful, outgoing presence with a great sense of humour. She has always been eager to share her knowledge with others and learn new skills. She's the perfect person to get a group project rolling, but she also knows how to sit back and let others take the lead. She is just the kind of driven, engaging, and curious student that is also remarkably and undeniably amazing when it comes to working under pressure.

She has demonstrated excellence in all that she puts her mind to. Her endless curiosity, combined with her willingness to take risks leads me to believe there will be no limit to her growth and achievements in college and beyond. I am sure that she will be successful in the research internship program and will render exceptional results. I offer my unqualified endorsement and hope that you will consider this recommendation letter and think through the candidacy of Sakshi for this internship.

I recommend Sakshi without any reservations.

Dr.M.B.Chandak
Professor & Head,
Department of Computer Science & Engg
R.C.O.E.M, Nagpur
